

Plaistow Conservation Commission is pleased to say that the timber maintenance cut is finished. However, there is still a lot of trail restoring to be done. The Commission has hired a Professional to help with this . A Plan has been made and needs to be followed. Some trails will be re-routed or closed to protect wildlife habitat. Working with the Commission is [Brent Ebner](#), we ask that you contact [Brent Ebner](#) if you wish to help in anyway. Please DON'T just go out and re-blaze trails or re-store them. I realize we are all anxious about getting the trails up and running again, but we have a plan, we must follow this plan. It has been approved by both the Commission and South East Land Trust (SELT) who holds the Easement on the Forest. By working together, we can reestablish the forest trail system so that it is enjoyable for everyone, including the wildlife.

Thank you, Plaistow Conservation Commission,
