Home /How it Works

Buy It, Fill It, Ship It. That's It!

With the Big Green Box, it is no longer necessary to pay large fees to waste management companies, fill out complicated paperwork, or look tirelessly around your city or county for a responsible drop-off location. Thanks to the Big Green Box, it is now easy to do the right thing with your used batteries and portable electronics!

Using the Big Green Box is as simple as a three-step process:

BUY IT

Once purchased, the Big Green Box will be shipped to your home, office or business, completely assembled and ready to be set in any location of your choosing.

FILL IT

As batteries and other electronic devices are used up, simply place the individual items in a separate bag OR cover the terminals with clear packing tape and place them inside the Box (the bags/tape prevent unintentional discharges or short circuits).

SHIP IT

Once your Big Green Box is ready to be shipped, simply call 1-800-Go-FedEx to schedule a pick up, free of charge, or give the box to any FedEx ground driver that stops by your home or office. It really doesn't get any easier.

THAT'S IT! The Big Green Box is specifically designed to be a simple, convenient process for you to recycle your batteries and electronics.
